

MM 99-25

July 28, 1999

Dear Sirs, 3 1999

This letter is in regards to the public comments the FCC is taking about micropower radio stations. I am in favor of low watt FM radio stations and I want the FCC to allow these stations to operate free of harassment from your agency.

I am strongly opposed to the FCC considering low watt FM radio 1000 watts! Micropower radio stations should be at least 10 watts and no more than 60 or 70. The 1000 watts is going to favor the National Association of Broadcasters and I want the FCC to rule against whatever they want.

I am also writing to express my concerns about how public radio stations do not have to elect their board members that run their stations. **This is not at all acceptable to me and I want this to stop immediately.** All public radio stations should be required to elect all of their board members and the FCC should implement this rule as soon as possible. Stations that do not elect their board members should lose their license to broadcast.

I am also writing in regards to the public television station that was being used by the Democrats for their mailing campaigns. This TV station should lose its license to broadcast effective immediately. They have violated the public trust and they **MUST** be punished! They must not be allowed to hold their license to broadcast. I intend to keep in touch with the FCC to make sure that this matter is taken care of in the appropriate manner.

Sincerely,

Andrew Metrogen
